

Street Terms: Drugs and the Drug Trade

The ability to understand current drug-related street terms is an invaluable tool for law enforcement, public health, and other criminal justice professionals who work with the public. This document contains over 2,300 street terms that refer to specific drug types or drug activity.

The list is organized —

- alphabetically
- by drug type
- by topic.

Examples include —

- "Woolah," which is a hollowed cigar filled with marijuana and crack
- "Kibbles & Bits," which is a term used to describe small crumbs of crack
- "Rave," which describes a party designed to enhance a hallucinogenic experience through lights and music
- "Wild cat," which is a term for methcathinone mixed with cocaine
- "Z," which indicates one ounce of heroin.

All terms are cross-referenced where possible. A single term or similar terms may refer to various drugs or have different meanings, reflecting geographic and demographic variations in slang. All known meanings and spellings are included. No attempt was made to determine which usage is most frequent or widespread. Different definitions for a single term are separated by semi-colons (;). The use of commas (,) and the connective "and" indicates that the term refers to the use of the specified drugs in combination.
